

GLOBAL FUTURE EXPO 2035

Official Visitor Welcome Kit – Barcelona, Spain

Welcome to the **Global Future Expo 2035**! This official guide is designed to help you navigate our incredible world exhibition dedicated to future technologies, sustainability, and groundbreaking ideas aimed at making our planet a better place [cite: 40]. Below you will find essential visitor information, answers to frequently asked questions, and a guide to our exclusive smart-guided technology ecosystem.

1. General Visitor Information (FAQ)

Q: How much does an admission ticket cost?

Admission is completely free for students of all ages! For adults, tickets can be booked directly on our official website [cite: 41, 42].

Q: What are the opening hours?

The Expo is open every day, Monday through Sunday, from 9:00 AM to 10:00 PM. Please note that special pavilions close slightly earlier at 9:30 PM [cite: 56, 57].

Q: How can I get to the Expo park?

We highly recommend using our electric eco-buses or the advanced self-driving shuttles. They leave every 5 minutes from the central station, making them super convenient and great for the environment [cite: 46, 47].

Q: Is the Expo wheelchair accessible?

Absolutely. The entire park is completely barrier-free, and we offer complimentary electric vehicles to help anyone who needs physical assistance get around comfortably [cite: 54].

Q: Can I bring my pet?

Of course! Four-legged friends are more than welcome as long as they are kept on a leash. We have also set up dedicated green areas for them complete with fresh water stations [cite: 43, 44, 45].

Q: What dining options are available?

We host a huge "Food of the Future Square" where you can taste sustainable snacks, local and international dishes, and revolutionary vertical farming produce [cite: 52, 53].

2. High-Tech Navigation & Smart Wearables

To ensure a cutting-edge, personalized experience, the Expo features an exclusive wearable technology ecosystem developed in collaboration with Apple and Nike [cite: 72, 73]. Visitors can utilize specialized tech glasses synchronized perfectly with smart footwear [cite: 68, 72].

AURA-STRIDE SMART GLASSES & FOOTWEAR

- **Augmented Reality (AR) Navigation:** A real-time 3D map is overlaid directly onto your glasses lenses, seamlessly guiding you toward your desired destinations, such as the Japan Pavilion [cite: 69, 70].
- **Active Spatial Audio Guide:** The glasses track your head movements and provide location-aware spatial audio commentary for the specific exhibition you are currently viewing [cite: 71].
- **The Aura-Stride Connection:** Built-in internal shoe sensors project an invisible "aura" or communication field of digital data [cite: 75, 76]. This syncs instantly with your Apple glasses and the Expo infrastructure to monitor your stride, step count, and physical comfort [cite: 72, 76, 78, 80]. This creates a fluid, intelligent, and lightweight walking experience [cite: 77, 81].

3. On-Site Support & Safety

If you ever get lost or need immediate help, you can easily access our AI virtual assistant at any time directly from your smartphone [cite: 39, 51]. Alternatively, you can walk up to any of our physical assistance points distributed across the park to speak with our human staff, easily recognizable by their bright green uniforms [cite: 51]. Numerous multilingual robot guides and helpful assistant drones are also roaming the park to assist you if you misplace any personal items [cite: 49].
